Use these brackets for unnumbered equations

1 Math Examples

$$\textit{Addition} \quad 4 + 6 = 10 \tag{1.1}$$

$$\textit{Subtract} \quad 8 - 3 = 5 \tag{1.2}$$

$$\textit{Multiplication} \quad 9 \times 4 = 36 \tag{1.3}$$

$$\textit{Division} \quad 25 \div 5 = 5 \tag{1.4}$$

$$\textit{Integral} \quad \Rightarrow \int_a^b x^2 dx \tag{1.5}$$

2 Use of Dollar Signs

$$5 + 5 = 10$$

3 Newline

Test Text

Test if newline works

Test if double backslash works for newline.

4 Conclusion

Here we have tested some mathematical functions and newlines.
